Information on Presence of Per- and polyfluoroalkyl substances (PFAS)

During the manufacturing of the Celanese products listed below, per- and polyfluoroalkyl substances (PFAS) as defined by the OECD¹ are not used or intentionally added.

This information is provided to the best of our knowledge and based on the information given by our raw material suppliers at the date hereof.

As we do not systematically analyse for the potential presence of these substances, we cannot guarantee that there are no trace amounts present as impurities.

List of Products

SANTOPRENE® 8281-75MED

Disclaimer/Important: This information is provided to the best of our knowledge and based on the information given by our raw material suppliers at the date hereof. It is believed accurate as the date of the document. This information relates only to the above-mentioned materials as delivered in their original packaging. It does not relate to any product made of these materials with or without the inclusion of further additives, such as processing aids or colorants. Celanese does not make any representations or warranties written, implied, or otherwise concerning the use of its products in customer applications. This information is not intended to substitute for any testing you may need to determine the suitability of this product for a particular purpose. This information should not be construed as a promise or guarantee of specific properties of the products described or their suitability for a particular application. Please note that the manufacturer or seller of parts and articles made of our Celanese Engineered Materials products has to take the full responsibility regarding applicable legal requirements. Any existing intellectual property rights must be observed. The information provided here does not cover the suitability of our Celanese Engineered Materials products for Food Contact applications, medical device applications, pharmaceutical applications, cosmetic applications, drinking water applications
